

- My name is Mary Truong. Currently I work in the community outreach and community benefits department at Carney. I have previously served the hospital and the Dorchester community as a trustee of the hospital.
- I am responsible for insuring that the hospital reaches out to diverse multi-cultural communities that reside in Dorchester and surrounding communities. We have many wonderful programs that support community health such as screenings and health talks by Carney's clinicians .
- Each year we publish this community benefit report which is available on our website and which outlines the commitment we have to the needs of the community. Last we spring did a community needs assessment and the results of that assessment drive the programs we set up for our community. We coordinate our efforts with public and private partners in Dorchester whenever possible.
- Carney Hospital has always supported me in reaching out to all of the underserved patients in Dorchester.

I believe that the proposed sale of Caritas to Cerberus is good for the hospital, good for the patients of the hospital and good for the community groups in Dorchester. Thank you.
